

# TCI Mobility™

## Newsletter Volume 2

*QUALITY. DURABILITY.  
INNOVATION.*

Now that 2019 is here, we want to give you an update on what's new and exciting at TCI Mobility. First, we moved both of our locations. Our Pennsylvania Production facility was opened in December 2018 and is still under construction. Fortunately, we are producing vans at or above the levels we were previously able to do. As for our Corporate offices, we also moved in December 2018 and stayed in Pompano Beach.

We have been extremely busy moving two offices and keeping production on schedule. Our incredibly dedicated staff have been working tirelessly to meet our time commitments and keep those vans moving off the line.

Our new production facility sits on 3 ½ acres in the beautiful Pocono Mountains in Pennsylvania.

Our new location is where routes 33 and 209 intersect in Sciota, PA. This makes it easier for truckers to deliver and pick up vans and materials to and from our facility. We believe that every improvement we make to our facilities and now our location will ultimately bring better pricing and products to our dealers and end users.

As we continue to upgrade and grow, our commitment remains to keeping our lead times short and to meeting and exceeding the highest quality and safety standards.

We are dedicated as a Ford QVM builder and FCA Ram approved second stage upfitter to always provide the highest standards for safety and quality.

Once you drive a TCI van, you'll want to buy a TCI van!

## **NEW PRODUCTS**

January 2019

Our new Ford Transit Jumbo Shuttle with a power side bus door is just what the doctor ordered! With its expanded seating capabilities and super quiet power bus door, this new TCI Shuttle is turning heads and making waves. We've shown our new prototype at major shows around the nation and the response has been amazing. Orders have been coming in rapidly and our amazing crew are pumping them out.

There are a variety of configurations and trim options to choose from. We have over 100 chassis' in stock ready to build and you can have one delivered in as little as 12 weeks. Make sure you ask one of our representatives how you can order one of these for stock.

We have a very motivated and successful dealer network established already and look forward to adding more dealers in the future.

In the near future, our website will allow customers to search by dealer and access their inventory of TCI vans. We want to make sure that the end user can find a van at any of our dealers that is built to the specifications that are most popular in their geographic area.

Any bus or mobility dealers that are interested in representing a product that has no peer, and are willing to provide exceptional service, please contact us to discuss your territory and our exclusive dealer arrangements.

## **NEW DEALERS**

TCI Mobility has undergone many changes since we began operations. One such change has been transforming our sales focus to market our product through a dealer network. We are always striving to bring the most innovative and safe vans to the marketplace. We also want to make sure that the end users of our vans get the service they need and desire all while meeting the stringent standards we require. Each dealer has the facilities and locations that will serve our present and future customer base.
