

Quality. Durability. Innovation.

Custom Configurations Available

Flexible seating and fully customizable floor plans allow quick and easy reconfigurations to accommodate wheelchair positions and passenger seating options. Customizable configurations are ideal for many market needs including paratransit vans, hotel shuttles, adult day care vans, airport shuttle/limo transportation and more.

Designed to Fit Your Customer's Every Need

At TCI Mobility, we offer an array of inventory already configured to suit your specific needs or our customers can special order a vehicle hand-built by our team of professionals using only the highest quality materials made and assembled right here in the United States.

Whether you need a basic shuttle van, paratransit van or a school bus, TCI Mobility can plan, customize and outfit just the right vehicle for optimal accessibility, safety and comfort. One-stop shopping enables you to spec, order and deliver your customer's next vehicle all with one phone call.

Let our experienced, dedicated and customer-focused team make the ordering and build process a seamless and hassle free experience. Enjoy ongoing support after the sale, with TCI Mobility's industry leading 4 year/50,000 mile conversion warranty.

Paratransit

TCI Mobility's paratransit vehicles are designed and engineered with safety in mind to provide comfortable and reliable transportation for people with disabilities. Multiple roof heights, side or rear lifts, and a mix of ambulatory features with wheelchair and seating options can accommodate up to 15 people. As a Ford QVM Certified Mobility Upfitter and FCA/RAM Certified Second Stage Upfitter, TCI Mobility's vehicles are made with the highest quality materials to meet or exceed FMVSS and ADA standards and can also be built to meet ANY state DOT requirements.

Executive Shuttles

Executive shuttle vans provide comfortable transportation that is easy for clients and staff to use for short to medium distance courtesy rides. Ideally sized and configured for airport transports, group events, or corporate outings, TCI Mobility shuttle/limo vans are durable and easy to clean, and are built with the highest quality materials to handle tough duties and heavy use. Your clients will appreciate the expansive, stylishly outfitted interior spaces and easy access in and out of these vehicles with center aisle seating and storage for luggage and equipment. Multiple roof heights and steps can also be spec'd for even more convenience. Custom paint or vinyl wraps make this the ideal choice for commercial use and corporate brand identity.

Crew Vans

TCI Mobility is more than just shuttles and paratransit vehicles. We also build crew vans for the trades. One, two, or three passenger seats in a cargo van can expand your passenger capacity to get everyone to the job site at once. We can also install our incredibly durable, rubber, puncture resistant diamond plate pattern, industrial grade, plywood over steel laminated flooring to protect your van's OEM floor and keep the interior looking new for years down the road. For carrying bigger loads, we can also design and build several styles of partitions (solid or rear view see through) to protect your passengers from full loads during abrupt stoppages.

School Transportation

Designed with safety in mind for transportation of children, our 9 passenger school bus conversions are a fuel efficient, practical alternative to larger cutaway or full size school buses. Similar to our airport and hotel shuttle line, these buses are equipped with lower curbside steps for those smaller legs, and with the availability of TCI Mobility's proprietary manual bus door operator that allows continued use of the OEM door latch, our conversions will ensure the security and safety of your "little" passengers.

TCI Mobility Advantage

HIGH QUALITY MATERIALS

- All electrical and air conditioning lines are loomed and tied inside the vehicle to eliminate wear and chafing
- LED lighting for superior light distribution and greater efficiency
- Industry exclusive full-length steel plate flooring with skid resistant diamond-plate rubber surfaces
